Career Path

Build an infrastructure that supports law firms in commonwealth countries in the business and practice of law.

To provide to these client firms a group of ‘best in class’ professionals that assist them in greater profitability as a business and superior results in and out of the court room.

To lead this group as it grows and learns and to apply their skills to our client base is my career path.

My intention is to lead from the front. I am in the firms, working on the opportunities with clients directly. Listening, adapting, growing (I hope).
